

Dual Capacity Oil Filter Recycling Container

Easy to empty oil contents

Safely drains various oil filter sizes

GEO Plastics unique oil filter recycling container provides a safe and easy way to drain, store, transport, and recycle used oil filters and the corresponding used oil.

Our unique product offers “do-it-yourselfers” a number of advantages:

- Drains up to two oil filters
- A durable base coupled with o-rings and fully threaded screw-on lids protect the recycling contents
- Each compartment contains a raised post allowing the used oil to drain safely and separately below the used oil filter
- Large openings allow for safe and easy handling of used oil filters and the related used oil
- Works with most automotive oil filter sizes
